**ASSERTION OF ACD DIRECT MANAGEMENT**

## ASSERTION OF ACD DIRECT MANAGEMENT

September 7, 2022

We have prepared the accompanying description of ACD Direct's ('the Company') Non Profit Marketing and Pledge Call Center Services System titled "ACD Direct's Description of Its Non Profit Marketing and Pledge Call Center Services System throughout the period September 1, 2021 to August 31, 2022" (description) based on the criteria for a description of a service organization's system in DC section 200, *2018 Description Criteria for a Description of a Service Organization's System in a SOC 2® Report* (AICPA, *Description Criteria*) (description criteria). The description is intended to provide report users with information about the Non Profit Marketing and Pledge Call Center Services System that may be useful when assessing the risks arising from interactions with ACD Direct's system, particularly information about system controls that ACD Direct has designed, implemented, and operated to provide reasonable assurance that its service commitments and system requirements were achieved based on the trust services criteria relevant to Security (applicable trust services criteria) set forth in TSP section 100, *2017 Trust Services Criteria for Security, Availability, Processing Integrity, Confidentiality, and Privacy*, (AICPA, *Trust Services Criteria*).

ACD Direct uses Flexential ('subservice organization') to provide data center hosting services. The description indicates that complementary subservice organization controls that are suitably designed and operating effectively are necessary, along with controls at ACD Direct, to achieve ACD Direct's service commitments and system requirements based on the applicable trust services criteria. The description presents ACD Direct's controls, the applicable trust services criteria, and the types of complementary subservice organization controls assumed in the design of ACD Direct's controls. The description does not disclose the actual controls at the subservice organization.

The description indicates that complementary user entity controls that are suitably designed and operating effectively are necessary, along with controls at ACD Direct, to achieve ACD Direct's service commitments and system requirements based on the applicable trust services criteria. The description presents ACD Direct's controls, the applicable trust services criteria, and the complementary user entity controls assumed in the design of ACD Direct's controls.

We confirm, to the best of our knowledge and belief, that:

- a. the description presents ACD Direct's Non Profit Marketing and Pledge Call Center Services System that was designed and implemented throughout the period September 1, 2021 to August 31, 2022, in accordance with the description criteria.
- b. the controls stated in the description were suitably designed throughout the period September 1, 2021 to August 31, 2022, to provide reasonable assurance that ACD Direct's service commitments and system requirements would be achieved based on the applicable trust services criteria, if its controls operated effectively throughout that period, and if the subservice organization and user entities applied the complementary controls assumed in the design of ACD Direct's controls throughout that period.
- c. the controls stated in the description operated effectively throughout the period September 1, 2021 to August 31, 2022, to provide reasonable assurance that ACD Direct's service commitments and system requirements were achieved based on the applicable trust services criteria, if complementary subservice organization controls and complementary user entity controls assumed in the design of ACD Direct's controls operated effectively throughout that period.

ACD Direct

**SECTION 2**

**INDEPENDENT SERVICE AUDITOR'S REPORT**

## INDEPENDENT SERVICE AUDITOR'S REPORT

To: ACD Direct

### *Scope*

We have examined ACD Direct's accompanying description of its Non Profit Marketing and Pledge Call Center Services System titled "ACD Direct's Description of Its Non Profit Marketing and Pledge Call Center Services System throughout the period September 1, 2021 to August 31, 2022" (description) based on the criteria for a description of a service organization's system in DC section 200, *2018 Description Criteria for a Description of a Service Organization's System in a SOC 2® Report* (AICPA, *Description Criteria*), (description criteria) and the suitability of the design and operating effectiveness of controls stated in the description throughout the period September 1, 2021 to August 31, 2022, to provide reasonable assurance that ACD Direct's service commitments and system requirements were achieved based on the trust services criteria relevant to Security (applicable trust services criteria) set forth in TSP section 100, *2017 Trust Services Criteria for Security, Availability, Processing Integrity, Confidentiality, and Privacy* (AICPA, *Trust Services Criteria*).

ACD Direct uses Flexential to provide data center hosting services. The description indicates that complementary subservice organization controls that are suitably designed and operating effectively are necessary, along with controls at ACD Direct, to achieve ACD Direct's service commitments and system requirements based on the applicable trust services criteria. The description presents ACD Direct's controls, the applicable trust services criteria, and the types of complementary subservice organization controls assumed in the design of ACD Direct's controls. The description does not disclose the actual controls at the subservice organization. Our examination did not include the services provided by the subservice organization, and we have not evaluated the suitability of the design or operating effectiveness of such complementary subservice organization controls.

The description indicates that complementary user entity controls that are suitably designed and operating effectively are necessary, along with controls at ACD Direct, to achieve ACD Direct's service commitments and system requirements based on the applicable trust services criteria. The description presents ACD Direct's controls, the applicable trust services criteria, and the complementary user entity controls assumed in the design of ACD Direct's controls. Our examination did not include such complementary user entity controls and we have not evaluated the suitability of the design or operating effectiveness of such controls.

The information included in Section 5, "Other Information Provided by the Service Organization," is presented by ACD Direct management to provide additional information and is not a part of the description. Information about ACD Direct's management's response to testing exceptions has not been subjected to the procedures applied in the examination of the description, the suitability of the design of controls, and the operating effectiveness of the controls to achieve ACD Direct's service commitments and system requirements based on the applicable trust services criteria.

### *Service Organization's Responsibilities*

ACD Direct is responsible for its service commitments and system requirements and for designing, implementing, and operating effective controls within the system to provide reasonable assurance that ACD Direct's service commitments and system requirements were achieved. ACD Direct has provided the accompanying assertion titled "Assertion of ACD Direct Management" (assertion) about the description and the suitability of design and operating effectiveness of controls stated therein. ACD Direct is also responsible for preparing the description and assertion, including the completeness, accuracy, and method of presentation of the description and assertion; providing the services covered by the description; selecting the applicable trust services criteria and stating the related controls in the description; and identifying the risks that threaten the achievement of the service organization's service commitments and system requirements.

### *Service Auditor's Responsibilities*

Our responsibility is to express an opinion on the description and on the suitability of design and operating effectiveness of controls stated in the description based on our examination. Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform our examination to obtain reasonable assurance about whether, in all material respects, the description is presented in accordance with the description criteria and the controls stated therein were suitably designed and operated effectively to provide reasonable assurance that the service organization's service commitments and system requirements were achieved based on the applicable trust services criteria. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

An examination of the description of a service organization's system and the suitability of the design and operating effectiveness of controls involves the following:

- Obtaining an understanding of the system and the service organization's service commitments and system requirements
- Assessing the risks that the description is not presented in accordance with the description criteria and that controls were not suitably designed or did not operate effectively
- Performing procedures to obtain evidence about whether the description is presented in accordance with the description criteria
- Performing procedures to obtain evidence about whether controls stated in the description were suitably designed to provide reasonable assurance that the service organization achieved its service commitments and system requirements based on the applicable trust services criteria
- Testing the operating effectiveness of controls stated in the description to provide reasonable assurance that the service organization achieved its service commitments and system requirements based on the applicable trust services criteria
- Evaluating the overall presentation of the description

Our examination also included performing such other procedures as we considered necessary in the circumstances.

### *Independence and Ethical Responsibilities*

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the examination engagement.

### *Inherent Limitations*

The description is prepared to meet the common needs of a broad range of report users and may not, therefore, include every aspect of the system that individual users may consider important to meet their informational needs.

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls.

Because of their nature, controls may not always operate effectively to provide reasonable assurance that the service organization's service commitments and system requirements are achieved based on the applicable trust services criteria. Also, the projection to the future of any conclusions about the suitability of the design and operating effectiveness of controls is subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

### *Description of Tests of Controls*

The specific controls we tested and the nature, timing, and results of those tests are listed in Section 4.

### *Opinion*

In our opinion, in all material respects:

- a. the description presents ACD Direct's Non Profit Marketing and Pledge Call Center Services System that was designed and implemented throughout the period September 1, 2021 to August 31, 2022, in accordance with the description criteria.
- b. the controls stated in the description were suitably designed throughout the period September 1, 2021 to August 31, 2022, to provide reasonable assurance that ACD Direct's service commitments and system requirements would be achieved based on the applicable trust services criteria, if its controls operated effectively throughout that period and if the subservice organization and user entities applied the complementary controls assumed in the design of ACD Direct's controls throughout that period.
- c. the controls stated in the description operated effectively throughout the period September 1, 2021 to August 31, 2022, to provide reasonable assurance that ACD Direct's service commitments and system requirements were achieved based on the applicable trust services criteria, if complementary subservice organization controls and complementary user entity controls assumed in the design of ACD Direct's controls operated effectively throughout that period.

### *Restricted Use*

This report, including the description of tests of controls and results thereof in Section 4, is intended solely for the information and use of ACD Direct, user entities of ACD Direct's Non Profit Marketing and Pledge Call Center Services System during some or all of the period September 1, 2021 to August 31, 2022, business partners of ACD Direct subject to risks arising from interactions with the Non Profit Marketing and Pledge Call Center Services System, practitioners providing services to such user entities and business partners, prospective user entities and business partners, and regulators who have sufficient knowledge and understanding of the following:

- The nature of the service provided by the service organization
- How the service organization's system interacts with user entities, business partners, subservice organizations, and other parties
- Internal control and its limitations
- Complementary user entity controls and complementary subservice organization controls and how those controls interact with the controls at the service organization to achieve the service organization's service commitments and system requirements
- User entity responsibilities and how they may affect the user entity's ability to effectively use the service organization's services
- The applicable trust services criteria
- The risks that may threaten the achievement of the service organization's service commitments and system requirements and how controls address those risks

This report is not intended to be, and should not be, used by anyone other than these specified parties.

*A-LIGN ASSURANCE*

Tampa, Florida  
September 7, 2022

### **SECTION 3**

#### **ACD DIRECT'S DESCRIPTION OF ITS NON PROFIT MARKETING AND PLEDGE CALL CENTER SERVICES SYSTEM THROUGHOUT THE PERIOD SEPTEMBER 1, 2021 TO AUGUST 31, 2022**

## OVERVIEW OF OPERATIONS

### Company Background

ACD was founded as a contact center service provider and utilized their partnerships and the exposure to coast-to-coast markets to provide viable solutions, best practices, and guidance when and where needed.

**Experienced:** Since 2003, ACD has been a virtual business continually working to expand their solutions and partnerships with public entities and nonprofit organizations across the United States, while adhering to the core values of being people-centric, proactive and a solutions broker. ACD currently provides customized solutions to more than 200 clients, the majority being public media stations.

**Qualified:** ACD strives to gain in-depth insight into their client's industry and to understand the needs, demands and challenges. ACD takes the time to collaborate with experienced vendors and industry experts to help align with the goals and objectives of each client.

**Responsive:** ACD provides 24/7 support to everyone involved from the client and its constituents to their agents. ACD responds by providing inbound and outbound call services, web-based support options (chat, text, e-mail) and applications to facilitate customer information management.

### Description of Services Provided

ACD provides Database Management Solution services with advanced communications throughout the United States. The Company was founded in 2003 to provide Non-Profit Marketing and Pledge Center Services System to its customers. ACD's integration of a database management solution with an advanced communications platform helps automate and optimize communications.

#### Description of Services:

- Outbound and Inbound Call Services
- Web Based Chat Support
- Click to Dial - The "Click to Chat" option allows visitors on the customer's website to be quickly connected to one of ACD's agents
- Text Messaging/E-mail Support
- Tiered Member Services Support - Member Services Support ('MSS') provides customers with scalable support. This skill-based tiering allows customers to choose the level of support necessary from solving coverage issues
- Custom Development Team - ACD's development team can create a customizable solution to meet customer's specific needs
- SimpleScript - SimpleScript is a dynamic and fully customizable scripting solution for call handling needs. All payment processing is handled through third-party application programming interface ('API'). Data captured within SimpleScript can be exported in a wide variety of formats via several secure transmission vehicles. (i.e., Web Service, File Transfer Protocol ('FTP'), Direct Download)
- Ticketing-Based Help Desk Application - Issue tracking is handled through ACD's Help Desk Application
- Trouble Shooter - ACD's Trouble shooter is built on a foundation of decision tree scripting. Quick answers to common questions allow a call path to be handled efficiently. Additional options can be added at any time
- Referral Database Warehousing - SimpleScript is ACD's Referral Database module which streamlines information storage by housing lists of contacts in a searchable, easily accessible format. Information will be at the ready when needed
- MC 2.0 and PledgeCart 3.0 - Capture data from anywhere or anytime. These applications were built on the same premise of SimpleScript
- Payment Processing Integration - ACD has integrated with several major payment processing gateways. ACD is Level 1 Payment Card Industry ('PCI') Compliant

- Reporting Suite - ACD's reporting suite allows customers the ability to track calls and transactions with ease. Reports can be accessed from anywhere allowing customers to gauge the success of their campaign 24/7/365
- On Hold Streaming - On Hold Streaming is a service offered that provides callers with relevant content with the power of live streaming. This is optimized for the telecommunications medium to ensure that callers have the best listening experience
- Call-Center-In-A-Box Total.Care Solution - This is a web-based platform that plays the role of switchboard, receptionist, and answering service, allowing customers to manage and route phone calls, set users/voice-mails/greetings, and streamline communications
- Cloud Based Telephony Platform - By utilizing a cloud base telephony platform, ACD can offer a highly flexible, customized contact routing solution that supports call routing and web-based chat support. Cloud based routing is secure and provides necessary redundancy to limit outages
- Toll Free/Local Number Procurement Assistance - ACD can help with procuring toll free or local numbers (i.e., Vanity Number). ACD can also assist with customers' search and purchase of this number

Donations are tracked through the payment cycle, from initial call assignment to completion of the payment. System-generated reports provide supporting documentation for donations.

Information is shared with user entities by telephone, FTP, e-mail, Electronic Data Exchange ('EDI'), and secured websites.

### **Principal Service Commitments and System Requirements**

ACD designs its processes and procedures related to Non-Profit Marketing and Pledge Center Services System to meet its objectives for its marketing and pledge call services. Those objectives are based on the service commitments that ACD makes to user entities, the laws and regulations that govern the provision of marketing and pledge call services, and the financial, operational, and compliance requirements that ACD has established for the services. The marketing and pledge call services of ACD are subject to the security and privacy requirements of the Health Insurance Portability and Accountability Act Administrative Simplification, as amended, including relevant regulations, as well as state privacy security laws and regulations in the jurisdictions in which ACD operates.

To safeguard ACD's information technology resources and to protect the confidentiality of data, adequate security measures are taken. ACD's Full Security Policy reflects ACD's commitment to comply with required standards governing the security of sensitive and confidential information.

ACD minimizes inappropriate exposures of confidential or sensitive information, loss of data and inappropriate use of computer networks and systems by complying with reasonable standards (such as Payment Card Industry Data Security Standard), attending to the proper design and control of information systems, and applying sanctions when violations of this security policy occur.

Security is the responsibility of everyone who uses ACD's information technology resources. It is the responsibility of employees, contractors, business partners, and agents of ACD. Each is familiar with this policy's provisions and the importance of adhering to it when using ACD's computers, networks, data, and other information resources. Each is responsible for reporting any suspected breaches of its terms. As such, information technology resource users are expected to adhere to policies and procedures mandated by the Information Technology ('IT') Supervisor and Director of IT at ACD.

All ACD employees undergo background checks and participate in annual security trainings, security scans, and performance reviews. They acknowledge company policies through ADP, ACD's payroll processor.

All ACD clients understand and acknowledge their security and confidentiality roles related to data, as spelled out in contracts and letters of agreement.

All ACD data partners and data vendors meet or exceed the compliance levels and standards as ACD.

In addition to these policies, standard operating procedures have been documented on how to carry out specific manual and automated processes required in the operation and development of the Non-Profit Marketing and Pledge Center Services System.

## Components of the System

### Infrastructure

Primary infrastructure used to provide ACD's Non-Profit Marketing and Pledge Call Center Services System includes the following:

Primary Infrastructure		
Hardware	Type	Purpose
Firewall	PaloAlto	Filters traffic from the internet to MGMT
Firewall	PaloAlto	Filters traffic redundantly to the demilitarized zone ('DMZ') network
Switches	Dell	Splits up network traffic between MGMT DMZ
Switches	Dell	Splits up network traffic between MGMT local area network ('LAN')
Server Hardware	Dell ESX	1u host server MGMT
Server Hardware	Dell ESX	1u host server DMZ
Server Hardware	Dell ESX	1u host server LAN
VM's	VMware ESXi Host	Integrates ACD's ESX servers into a virtual environment
NAC	Milton	This appliance is referenced by gateway and CWW for Contact Center agents to be able to user ACD's applications. Users comply with this device's security policies before being able to access their accounts in GW/CWW for the application

### Software

Primary software used to provide ACD's Non-Profit Marketing and Pledge Call Center Services System includes the following:

Primary Software		
Software	Operating System	Purpose
VMware	VMware ESXi	Enterprise-class, type-1 hypervisor developed by VMware for deploying and serving virtual computers
Kayako	Ubuntu Linux (64-bit)	Help desk support ticket software
Microsoft SQL	Microsoft Windows Server 2012 (64-bit)	Database software

Primary Software		
Software	Operating System	Purpose
AtomicOSSEC	Centos 7	Network monitoring software. Incident management
McAfee	Microsoft Windows Server 2012 (64-bit)	Antivirus Software

### *People*

The ACD staff provides support for the above services in each of the following functional areas:

- Executive Management - provides general oversight and strategic planning of operations
- Development Team - responsible for delivering a responsive system that fully complies with the functional specification
- System Administrators and IT - responsible for effective provisioning, installation/configuration, operation, and maintenance of systems hardware and software relevant to the system
- Contact Center - serves customers by providing service that includes resolving product and service issues
- Client Management and Sales - responsible for drafting and executing contracted services for each respective client
- Product Management - responsible for product management, performs regularly scheduled audits relative to defined standards, provides continuous improvement feedback, and assesses legal and regulatory requirements

### *Data*

Customer data is managed, processed, and stored in accordance with the relevant data protection and other regulations, with specific requirements formally established in customer contracts.

Such data includes, but is not limited to, the following:

- Alert notifications and monitoring reports generated from the commercial monitoring applications
- Alert notifications received from automated backup systems
- Vulnerability or security alerts received from various sources including security subscriptions, scanning tools, Intrusion Detection System ('IDS') alerts, or automated patching systems
- Incident reports documented via the ticketing systems

Output reports are available in electronic portable document format ('PDF'), comma-delimited value file exports, or electronically from the various websites. Reports delivered externally will only be sent using a secure method-encrypted e-mail, secure FTP, or secure websites-to transportation providers, treating facilities, and governments or managed care providers using ACD-developed websites or over connections secured by trusted security certificates. ACD uses Transport Layer Security to encrypt e-mail exchanges with government or managed care providers, facility providers, and transportation providers.

### *Processes, Policies and Procedures*

Formal IT policies and procedures exist that describe physical security, logical access, computer operations, change control, and data communication standards. All teams are expected to adhere to the ACD policies and procedures that define how services should be delivered. These are located on the Company's SharePoint and can be accessed by any ACD team member. All policies are reviewed annually by ACD's Director of IT and IT Supervisor.

## Physical Security

The in-scope system and supporting infrastructure is hosted by Flexential. As such, Flexential is responsible for the physical security controls for the in-scope system. Please refer to the Subservice Organizations section below.

## Logical Access

ACD uses role-based security architecture and requires users of the system to be identified and authenticated prior to the use of any system resources.

All assets are inventoried and managed centrally, by ACD's Human Resources ('HR') department. Owners are responsible for approving access to the resource and for performing quarterly reviews of access by role. ACD leverages ADP, the nation's largest payroll processor, and its systems as ACD's primary employee management tool.

## Access Review:

On an annual basis, access rules for each role are reviewed by a working group composed of security help desk, data center, customer service, and HR personnel. In evaluating role access, group members consider job description, duties requiring segregation, and risks associated with access. Completed rules are reviewed and approved by IT. As part of this process, IT reviews access by privileged roles and requests modifications based on this review.

On an ongoing basis, access controls are reviewed for each employee and generally for employees.

As needed, managers review the roles of their direct reports. Role lists are generated by security and distributed to the managers via the event management system. Managers review the lists and indicate the required changes in the event management record. The record is routed back to the security help desk for processing. The security help desk manager identifies any records not returned within two weeks and follows up with the manager. As part of this process, IT reviews employees with access to privileged roles and requests modifications through Jira.

ACD's new hire process includes the following components:

- Filling out of the new hire provision form by the new manager after formal offer letter sent to new employee
- Background checks, completed W-4, and I-9 reviewed/received before employee start date
- ADP onboarding for employee handbook and policy acknowledgement, as well as payroll processing
- Equipment order and shipment
- First month of training and basecamp new hire checklist, including but not limited to, security training, login/system training, meeting with executive managers and teammates, etc.

## New Hire Provisioning:

ACD requires the completion of the new hire form which denotes which logical access the new hire will need. Form responses are sent directly to the ACD Development Team, creating a ticket in Jira for dev to set-up specific logins and other organizational access.

On an annual basis, access rules for each role are reviewed by a working group composed of IT, Operations ('OPS'), and HR personnel. In evaluating role access, group members consider job description, duties requiring segregation, and risks associated with access. Roles are reviewed by the IT Infrastructure Manager and Director of IT, specifically concerning access to data security. Access rules have been pre-defined based on the defined roles. The system lists also include employees with position changes and the associated roles to be changed within the access rules.

### Authentication:

Password authentication and rules are set by requirements related to PCI, SOC2, and HIPAA compliance audits.

All employees access the ACD systems on secure sites through a web browser with specific user credentials. Employee's logins are revoked by a Systems Administration at termination. All access requires two-factor authentication, rigorous password security, as well as additional security tracking utilizing network access control ('NAC') by call registry and constant monitoring. User roles include:

- Executive Management - provides general oversight and strategic planning of operations. Approves user creation and informs System Admins of user roles
- System Administrators - responsible for effective provisioning, installation/configuration, operation, and maintenance of systems hardware and software relevant to the system. Creates users, grants access. Admins have the highest-level access and go through multi-factor authentication and additional security protocols
- Contact Center - serves customers by providing service that includes resolving product and service issues. May request user creation through executive management
- Client Management and Sales - responsible for drafting and executing contracted services for each respective client. May request user creation through executive management
- Project Management - performs regularly scheduled audits relative to defined standards, provides continuous improvement feedback, and assesses legal and regulatory requirements. May request user creation through executive management

### Termination:

At the initiation of an employee's termination of employment, the HR Generalist automatically generates an access deletion record with the IT Infrastructure Manager. This record is routed to the access administrators for deletion.

ACD's Employee Terminations process flow begins with a de-provision notification sent to IT team, specific for disabling access. The employee is then notified of termination and their systems access revocation. The employee ships back any company equipment, final payroll processing takes, and an exit interview is offered and conducted (if employee chooses).

### Computer Operations - Backups

Customer data is backed up and monitored by operations personnel for completion and exceptions. In the event of an exception, operations personnel perform troubleshooting to identify the root cause and then re-run the backup job immediately or as part of the next scheduled backup job depending on customer indicated preference within the documented work instructions.

Sensitive or confidential data (e.g., Cardholder Data: Primary account number ('PAN') and sensitive authentication data) are protected when stored and when it is in transit over public (or untrusted) networks. Strong industry standard encryption methodologies are used to protect data stored on hard drives, removable media, backups, etc. ACD follows a strict security policy according to PCI-DSS standards.

### Computer Operations - Availability

Incidents or suspected incidents regarding the security of the cardholder data network or cardholder data itself are handled quickly and in a controlled, coordinated, and specific manner, by ACD. An incident response plan is followed in the event of a breach or suspected breach. The following policies specifically address the ACD Incident Response Plan:

- ACD maintains a documented Incident Response Plan ('IRP') and be prepared to respond immediately to a system breach
- The IRP clearly defines roles and responsibilities for response team members

- The IRP defines communication strategies to be used in the event of a compromise including notification of payment brands
- The IRP defines specific incident response procedures to be followed
- The IRP documents business recovery and continuity procedures
- The IRP details data back-up processes
- The IRP contains an analysis of legal requirements for reporting compromises of sensitive data (for example, California Bill 1386 which requires notification of affected consumers in the event of an actual or suspected compromise of California resident's data)
- The IRP addresses coverage and responses for critical system components
- The IRP includes or reference the specific incident response procedures from the payment brands
- The IRP are tested at least annually (maintain evidence that can be validated showing that testing is being performed as per policy)
- ACD designates specific personnel to be available on a 24/7 basis to respond to alerts. This 24/7 coverage needs to include incident response and monitoring coverage for any evidence of unauthorized activity, detection of unauthorized wireless access points, critical intrusion detection software ('IDS') alerts, and reports of unauthorized critical system or application file changes
- Require that staff with security breach responsibilities (as defined in the IRP) are trained on their response procedures
- A detailed process and/or procedure for monitoring and responding to alerts from security monitoring systems, including detection of wireless access points, are defined, and documented in the IRP
- A process are and is in place for modifying and evolving the IRP according to lessons learned and integrating best practices as the industry develops

ACD uses Flexential monitoring reports and controls to manage data center space, storage, bandwidth, uptime, and overall system efficiency. If the issue is found critical, automation creates a ticket.

Atomic OSSEC reports checked daily, critical issues are brought to immediate attention.

### Change Control

ACD maintains documented Systems Development Life Cycle ('SDLC') policies and procedures to guide personnel in documenting and implementing application and infrastructure changes. Change control procedures include change request and initiation processes, documentation requirements, development practices, quality assurance testing requirements, and required approval procedures.

Atlassian's Jira ticketing system is utilized to document the change control procedures for changes in the application and implementation of new changes. Quality assurance testing and User Acceptance Testing ('UAT') results are documented and maintained with the associated change request. Development and testing are performed in an environment that is logically separated from the production environment. IT Administrators approve changes prior to migration to the production environment and documents those approvals within the ticketing system and Subversion ('SVN').

Beyond Compare is utilized to maintain source code versions and migrate source code through the development process to the production environment. SVN maintains a history of code changes to support rollback capabilities and tracks changes to developers.

### Data Communications

Firewall systems are in place to filter unauthorized inbound network traffic from the Internet and deny any type of network connection that is not explicitly authorized. Network address translation ('NAT') functionality is utilized to manage internal IP addresses. Administrative access to the firewall is restricted to authorized employees.

Redundancy is built into the system infrastructure supporting the data center services to help ensure that there is no single point of failure that includes firewalls, switches, and servers. If a primary system fails, the redundant hardware is configured to take its place.

Penetration testing is conducted to measure the security posture of a target system or environment. A-LIGN uses an accepted industry standard penetration testing methodology specified by ACD. A-LIGN's approach begins with a vulnerability analysis of the target system to determine what vulnerabilities exist on the system that can be exploited via a penetration test, simulating a disgruntled/disaffected insider or an attacker that has obtained internal access to the network. Once vulnerabilities are identified A-LIGN attempts to exploit the vulnerabilities to determine whether unauthorized access or other malicious activity is possible. Penetration testing includes network and application layer testing as well as testing of controls and processes around the networks and applications and occurs from both outside (external testing) and inside the network.

Individuals with malicious intent use security vulnerabilities to gain privileged access to systems. Many of these vulnerabilities can be fixed by applying vendor-provided security patches. All critical systems have recently released, appropriate software patches to protect against exploitation and compromise of sensitive data (cardholder data) by individuals with malicious intent and the use of malicious software.

Authorized employees may access the system through from the Internet through the use of leading Virtual Private Network ('VPN') technology. Employees are authenticated through the use of a token-based two-factor authentication system.

### **Boundaries of the System**

The scope of this report includes the Non-Profit Marketing and Pledge Call Center Services System performed virtually.

This report does not include the data center hosting services provided by Flexential.

## **RELEVANT ASPECTS OF THE CONTROL ENVIRONMENT, RISK ASSESSMENT PROCESS, INFORMATION AND COMMUNICATION, AND MONITORING**

### **Control Environment**

#### *Integrity and Ethical Values*

The effectiveness of controls cannot rise above the integrity and ethical values of the people who create, administer, and monitor them. Integrity and ethical values are essential elements of ACD's control environment, affecting the design, administration, and monitoring of other components. Integrity and ethical behavior are the product of ACD's ethical and behavioral standards, how they are communicated, and how they are reinforced in practices. They include management's actions to remove or reduce incentives and temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts. They also include the communication of entity values and behavioral standards to personnel through policy statements and codes of conduct, as well as by example.

Specific control activities that the service organization has implemented in this area are described below:

- Formally documented policies communicate the ACD organizational values to personnel. All policies are available on-demand through ACD's company SharePoint and ACD's payroll processor, Trax
- All employees read and acknowledge the ACD employee handbook, which includes code of conduct, professionalism, and integrity standards
- A confidentiality statement agreeing not to disclose proprietary or confidential information, including client information, to unauthorized parties is a component of the employee handbook
- Background checks are performed for employees as a component of the hiring process

### *Commitment to Competence*

ACD's management defines competence as the knowledge and skills necessary to accomplish tasks that define employees' roles and responsibilities. Management's commitment to competence includes management's consideration of the competence levels for particular jobs and how those levels translate into the requisite skills and knowledge.

Specific control activities that the service organization has implemented in this area are described below:

- Management has considered the competence levels for particular jobs and translated required skills and knowledge levels into written position requirements
- Training is provided to maintain the skill level of personnel in certain positions

### *Management's Philosophy and Operating Style*

ACD's management philosophy and operating style encompass a broad range of characteristics. Such characteristics include management's approach to taking and monitoring business risks, and management's attitudes toward information processing, accounting functions, and personnel.

Specific control activities that the service organization has implemented in this area are described below:

- Management is briefed on regulatory and industry changes affecting the services provided at least on an annual basis
- Executive management meetings are held to discuss major initiatives and issues that affect the business as a whole

### *Organizational Structure and Assignment of Authority and Responsibility*

ACD's organizational structure provides the framework within which its activities for achieving entity-wide objectives are planned, executed, controlled, and monitored. Management believes establishing a relevant organizational structure includes considering key areas of authority and responsibility. An organizational structure has been developed to suit its needs. This organizational structure is based, in part, on its size and the nature of its activities.

ACD's assignment of authority and responsibility activities include factors such as how authority and responsibility for operating activities are assigned and how reporting relationships and authorization hierarchies are established. It also includes policies relating to appropriate business practices, knowledge, and experience of key personnel, and resources provided for carrying out duties. In addition, it includes policies and communications directed at ensuring personnel understand the entity's objectives, know how their individual actions interrelate and contribute to those objectives, and recognize how and for what they will be held accountable.

Specific control activities that the service organization has implemented in this area are described below:

- Organizational charts are in place to communicate key areas of authority and responsibility
- Organizational charts are communicated to employees and updated as needed

### *Human Resources Policies and Practices*

ACD's success is founded on sound business ethics, reinforced with a high level of efficiency, integrity, and ethical standards. The result of this success is evidenced by its proven track record for hiring and retaining top quality personnel who ensure the service organization is operating at maximum efficiency. ACD's HR policies and practices relate to employee hiring, orientation, training, evaluation, counseling, promotion, compensation, and disciplinary activities.

ACD's employee management components include (but are not limited to): annual performance review through ADP, annual (if not more frequent) security trainings, annual equipment inventories, annual (if not more frequent) security scans, annual benefit enrollment and review, monthly webinars and all-hands meetings, and quarterly performance check-ins (if needed).

Specific control activities that the service organization has implemented in this area are described below:

- New employees are required to sign acknowledgement forms for the employee handbook and a confidentiality agreement following new hire orientation on their first day of employment
- All employees go through annual trainings, including security
- All employee systems go through security scans at least annually
- Evaluations for each employee are performed on an annual basis
- Employee termination procedures are in place to guide the termination process and are documented in a termination checklist

### **Risk Assessment Process**

ACD's risk assessment process identifies and manages risks that could potentially affect ACD's ability to provide reliable contact center services to non-profit organizations. This ongoing process requires that management identify significant risks inherent in products or services as they oversee their areas of responsibility. ACD identifies the underlying sources of risk, measures the impact to organization, establishes acceptable risk tolerance levels, and implements appropriate measures to monitor and manage the risks.

This process has identified risks resulting from the nature of the services provided by ACD, and management has implemented various measures designed to manage these risks. Risks identified in this process include the following:

- Operational risk - changes in the environment, staff, or management personnel
- Strategic risk - new technologies, changing business models, and shifts within the non-profit industry
- Compliance - legal and regulatory (PCI / SOC2) changes

ACD has established a lawyer on retainer and a compliance point person that is responsible for identifying risks to the entity and monitoring the operation of the firm's internal controls. The approach is intended to align the entity's strategy more closely with its key stakeholders, assist the organizational units with managing uncertainty more effectively, minimize threats to the business, and maximize its opportunities in the rapidly changing non-profit marketplace. ACD does actively identify and mitigate significant risks through the implementation of various security initiatives and continuous communication with other leadership committees and senior management.

### *Integration with Risk Assessment*

The environment in which the system operates; the commitments, agreements, and responsibilities of ACD's Non-Profit Marketing and Pledge Call Services System; as well as the nature of the components of the system result in risks that the criteria will not be met. ACD addresses these risks through the implementation of suitably designed controls to provide reasonable assurance that the criteria are met. Because each system and the environment in which it operates are unique, the combination of risks to meeting the criteria and the controls necessary to address the risks will be unique. As part of the design and operation of the system, ACD's management identifies the specific risks that the criteria will not be met and the controls necessary to address those risks.

### **Information and Communications Systems**

Information and communication are an integral component of ACD's internal control system. It is the process of identifying, capturing, and exchanging information in the form and time frame necessary to conduct, manage, and control the entity's operations. This process encompasses the primary classes of transactions of the organization, including the dependence on, and complexity of, information technology. At ACD, information is identified, captured, processed, and reported by various information systems, as well as through conversations with clients, vendors, regulators, and employees.

Various weekly calls are held to discuss operational efficiencies within the applicable functional areas and to disseminate new policies, procedures, controls, and other strategic initiatives within the organization. Additionally, company-wide meetings are held monthly through Microsoft Teams to provide staff with updates on the firm and key issues affecting the organization and its employees. Senior executives lead the company-wide meetings with information gathered from formal automated information systems and informal databases, as well as conversations with various internal and external colleagues. General updates to entity-wide security policies and procedures are usually communicated to the appropriate ACD personnel via e-mail messages.

## **Monitoring Controls**

Management monitors controls to ensure that they are operating as intended and that controls are modified as conditions change. ACD's management performs monitoring activities to continuously assess the quality of internal control over time. Necessary corrective actions are taken as required to correct deviations from company policies and procedures. Employee activity and adherence to company policies and procedures is also monitored. This process is accomplished through ongoing monitoring activities, separate evaluations, or a combination of the two.

### *On-Going Monitoring*

ACD's management conducts quality assurance monitoring on a regular basis and additional training is provided based upon results of monitoring procedures. Monitoring activities are used to initiate corrective action through department meetings, internal conference calls, and informal notifications.

Management's close involvement in ACD's operations helps to identify significant variances from expectations regarding internal controls. Upper management evaluates the facts and circumstances related to any suspected control breakdown. A decision for addressing any control's weakness is made based on whether the incident was isolated or requires a change in the company's procedures or personnel. The goal of this process is to ensure legal compliance and to maximize the performance of ACD's personnel.

### *Reporting Deficiencies*

An internal tracking tool is utilized to document and track the results of on-going monitoring procedures. Escalation procedures are maintained for responding and notifying management of any identified risks. Risks receiving a high rating are responded to immediately. Corrective actions, if necessary, are documented and tracked within the internal tracking tool. Annual risk meetings are held for management to review reported deficiencies and corrective actions.

## **Risk Assessments**

ACD has a risk assessment process in place to identify and manage the risks that could affect the Company's ability to provide services to its user entities. The risk assessment procedure defines the responsibility, methodologies and processes used by ACD to assess the risks while providing services and develop mitigation strategies to address those risks. This process requires the Company to identify risk based on management's internal knowledge of its operations. The following risk factors are discussed among the executive management including the Director of IT and IT Infrastructure Manager at least on an annual basis:

- Risk Assessment: The risk assessment is performed by the risk management personnel. Risk factors associated with the delivery or implementation of services to customers are evaluated considering process owners, dependencies, timelines, and quality
- Health Information Security Risks: Health information security risks are assessed by Director of IT. Risk factors associated with the organization are evaluated considering compliance obligations, laws, and regulations, policies, and procedures, contracts, and best practices to which the organization has committed to. Information security assessments carried out by risk management personnel are rolled up to the Director of IT and IT Supervisor of the organization

## Changes to the System in the Last 12 Months

No significant changes have occurred to the services provided to user entities in the 12 months preceding the end of the review period.

## Incidents in the Last 12 Months

No significant incidents have occurred to the services provided to user entities in the 12 months preceding the end of the review period.

## Criteria Not Applicable to the System

All Common criterion was applicable to the Non-Profit Marketing and Pledge Call Center Services System.

## Subservice Organizations

This report does not include the data center hosting services provided by Flexential.

### *Subservice Description of Services*

Flexential provides data center hosting services for ACD. Flexential provided added security such as physical data center security, formal access procedures, as well as equipment delivery and storage.

### *Complementary Subservice Organization Controls*

ACD's services are designed with the assumption that certain controls will be implemented by the subservice organization. Such controls are called complementary subservice organization controls. It is not feasible for all of the Trust Services Criteria requirements related to ACD's services to be solely achieved by ACD control procedures. Accordingly, the subservice organization, in conjunction with the services, should establish their own internal controls or procedures to complement those of ACD.

The following subservice organization controls should be implemented by Flexential to provide additional assurance that the Trust Services Criteria requirements described within this report are met:

Subservice Organization - Flexential		
Category	Criteria	Control
Common Criteria / Security	CC6.4, CC7.2	Two separate two-factor authentication systems are utilized to control access to the data centers. The systems require the following before granting access: <ul style="list-style-type: none"><li>• Access card and PIN at building entrances</li><li>• Access card and biometric scan at data center entrance</li></ul>
		Visitors are required to wear a visitor badge while visiting the data centers.
		Data center visitors are required to be accompanied and supervised by an authorized Flexential employee or client escort.
		Visitors are required to sign-in with onsite security personnel prior to entering the data centers.
		Client equipment is maintained in lockable cages or racks within the data centers.
		Vendors are required to sign a vendor accountability form to perform maintenance in the data centers.

Subservice Organization - Flexential		
Category	Criteria	Control
		The Director of Compliance, at Flexential, reviews user account access of terminated employees.
		A termination checklist is completed, and access is revoked for employees as a component of the employee termination process.
		Documented security procedures are in place to govern vendor access to the data centers, and include, but are not limited to, the following: <ul style="list-style-type: none"> <li>• Health and safety</li> <li>• Vendor Verification and Access</li> <li>• Vendor Accountability</li> <li>• Maintenance activity logging</li> </ul>
		The data centers are equipped with fueled electric power generators to provide backup power in the event of a power outage.
		The data centers are connected to multiple redundant uninterruptible power supply ('UPS') systems configured to provide temporary electricity in the event of a power outage.

ACD management, along with the subservice organization, define the scope and responsibility of the controls necessary to meet all the relevant Trust Services Criteria through written contracts, such as service level agreements. In addition, ACD performs monitoring of the subservice organization controls, including the following procedures:

- Reviewing attestation reports over services provided by vendors and subservice organization
- Monitoring external communications, such as customer complaints relevant to the services by the subservice organization

## COMPLEMENTARY USER ENTITY CONTROLS

ACD's services are designed with the assumption that certain controls will be implemented by user entities. Such controls are called complementary user entity controls. It is not feasible for all of the Trust Services Criteria requirements related to ACD's services to be solely achieved by ACD control procedures. Accordingly, user entities, in conjunction with the services, should establish their own internal controls or procedures to complement those of ACD's.

The following complementary user entity controls should be implemented by user entities to provide additional assurance that the Trust Services Criteria requirements described within this report are met. As these items represent only a part of the control considerations that might be pertinent at the user entities' locations, user entities' auditors should exercise judgment in selecting and reviewing these complementary user entity controls.

1. User entities are responsible for understanding and complying with their contractual obligations to ACD.
2. User entities are responsible for notifying ACD of changes made to technical or administrative contact information.
3. User entities are responsible for ensuring the supervision, management, and control of the use of ACD services by their personnel.
4. User entities are responsible for developing their own disaster recovery and business continuity plans that address the inability to access or utilize ACD services.

5. User entities are responsible for providing ACD with a list of approvers for security and system configuration changes for data transmission.
6. User entities are responsible for immediately notifying ACD of any actual or suspected information security breaches, including compromised user accounts, including those used for integrations and secure file transfers.

## TRUST SERVICES CATEGORIES

### *In-Scope Trust Services Categories*

Common Criteria (to the Security Category)
<p>Security refers to the protection of:</p> <ol style="list-style-type: none"> <li>i. information during its collection or creation, use, processing, transmission, and storage and</li> <li>ii. systems that use electronic information to process, transmit or transfer, and store information to enable the entity to meet its objectives. Controls over security prevent or detect the breakdown and circumvention of segregation of duties, system failure, incorrect processing, theft or other unauthorized removal of information or system resources, misuse of software, and improper access to or use of, alteration, destruction, or disclosure of information.</li> </ol>

### *Control Activities Specified by the Service Organization*

The applicable Trust Services Criteria, risks, and related control activities are included in Section 4 of this report to eliminate the redundancy that would result from listing them in this section. Although the applicable Trust Services Criteria and related control activities are included in Section 4, they are, nevertheless, an integral part of ACD's description of the system. Any applicable Trust Services Criteria that are not addressed by control activities at ACD are described within Section 4.

The description of the service auditor's tests of operating effectiveness and the results of those tests are also presented in Section 4. The description of the tests of operating effectiveness and the results of those tests are the responsibility of the service auditor and should be considered information provided by the service auditor.

## **SECTION 4**

### **TRUST SERVICES CATEGORY, CRITERIA, RELATED CONTROLS, AND TESTS OF CONTROLS**

## **GUIDANCE REGARDING TRUST SERVICES CATEGORY, CRITERIA, RELATED CONTROLS, AND TESTS OF CONTROLS**

A-LIGN ASSURANCE's examination of the controls of ACD Direct was limited to the Trust Services Criteria, related criteria and control activities specified by the management of ACD Direct and did not encompass all aspects of ACD Direct's operations or operations at user entities. Our examination was performed in accordance with American Institute of Certified Public Accountants (AICPA) AT-C 105 and AT-C 205.

Our examination of the control activities was performed using the following testing methods:

<b>TEST</b>	<b>DESCRIPTION</b>
Inquiry	The service auditor made inquiries of service organization personnel. Inquiries were made to obtain information and representations from the client to determine that the client's knowledge of the control and corroborate policy or procedure information.
Observation	The service auditor observed application of the control activities by client personnel.
Inspection	The service auditor inspected among other items, source documents, reports, system configurations to determine performance of the specified control activity and in some instances the timeliness of the performance of control activities.
Re-performance	The service auditor independently executed procedures or controls that were originally performed by the service organization as part of the entity's internal control.

In determining whether the report meets the criteria, the user auditor should perform the following procedures:

- Understand the aspects of the service organization's controls that may affect the service commitments and system requirements based on the applicable trust services criteria;
- Understand the infrastructure, software, procedures and data that are designed, implemented and operated by the service organization;
- Determine whether the criteria are relevant to the user entity's assertions; and
- Determine whether the service organization's controls are suitably designed to provide reasonable assurance that its service commitments and system were achieved based on the applicable trust services criteria.

## CONTROL ACTIVITIES SPECIFIED BY THE SERVICE ORGANIZATION

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Control Environment				
CC1.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
CC1.1	COSO Principle 1: The entity demonstrates a commitment to integrity and ethical values.	Core values are communicated from executive management to personnel through policies, directives, guidelines, the code of conduct and the employee handbook.	Inspected the employee handbook, information security policies and procedures and the entity's Intranet to determine that core values were communicated from executive management to personnel through policies, directives, guidelines, the code of conduct and the employee handbook.	No exceptions noted.
		An employee handbook and code of conduct are documented to communicate workforce conduct standards and enforcement procedures.	Inspected the employee handbook to determine that an employee handbook and code of conduct were documented to communicate workforce conduct standards and enforcement procedures.	No exceptions noted.
		Upon hire, personnel are required to acknowledge the employee handbook and code of conduct.	Inspected the signed employee handbook acknowledgements for a sample of new hires to determine that upon hire, personnel were required to acknowledge the employee handbook and code of conduct.	No exceptions noted.
		Upon hire, personnel are required to sign a non-disclosure agreement.	Inspected the signed employee handbook acknowledgements for a sample of new hires to determine that upon hire, personnel were required to sign a non-disclosure agreement.	No exceptions noted.

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Control Environment				
CC1.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
		<p>Prior to employment, personnel are required to complete a background check.</p> <p>Personnel are required to acknowledge the employee handbook and code of conduct on an annual basis.</p> <p>Performance and conduct evaluations are performed for personnel on an annual basis.</p> <p>Sanction policies, which include probation, suspension, and termination, are in place for employee misconduct.</p> <p>Employees are directed on how to report unethical behavior in a confidential manner.</p>	<p>Inspected the background check policies and procedures and the completed background check for a sample of new hires to determine that prior to employment, personnel were required to complete a background check prior to employment.</p> <p>Inspected the signed employee handbook acknowledgements for a sample of current employees to determine that personnel were required to acknowledge the employee handbook and code of conduct on an annual basis.</p> <p>Inspected the performance and conduct evaluation tracking spreadsheet for a sample of current employees to determine that performance and conduct evaluations were performed for personnel on an annual basis.</p> <p>Inspected the employee handbook to determine that sanction policies, which include probation, suspension, and termination, were in place for employee misconduct.</p> <p>Inspected the employee handbook and reporting tool to determine that employees were directed on how to report unethical behavior in a confidential manner.</p>	<p>Testing of the control activity disclosed that a background check did not occur prior to hire for one of 16 new hires sampled.</p> <p>No exceptions noted.</p> <p>No exceptions noted.</p> <p>No exceptions noted.</p> <p>No exceptions noted.</p>

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Control Environment				
CC1.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
CC1.2	COSO Principle 2: The board of directors demonstrates independence from management and exercises oversight of the development and performance of internal control.	Executive management roles and responsibilities are documented and reviewed on an annual basis.	Inspected the executive management job descriptions including revision dates to determine that executive management roles and responsibilities were documented and on an annual basis.	No exceptions noted.
		Executive management defines and documents the skills and expertise needed among its members.	Inspected the executive management job descriptions to determine that executive management defined and documented the skills and expertise needed among its members.	No exceptions noted.
		Executive management maintains independence from those that operate the key controls within the environment.	Inspected the organizational chart and the completed internal controls matrix to determine that executive management-maintained independence from those that operate the key controls within the environment.	No exceptions noted.
		Executive management meets annually with operational management to assess the effectiveness and performance of internal controls within the environment.	Inspected the compliance summary meeting minutes to determine that executive management met annually with operational management to assess the effectiveness and performance of internal controls within the environment.	No exceptions noted.

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Control Environment				
CC1.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
		Executive management evaluates the skills and competencies of those that operate the internal controls within the environment annually.	Inspected the evaluation tracking spreadsheet for a sample of current employees to determine that executive management evaluated the skills and competencies of those that operate the internal controls within the environment annually.	No exceptions noted.
		Operational management assigns responsibility for and monitors the effectiveness and performance of internal controls implemented within the environment.	Inspected the completed internal controls matrix to determine that operational management assigned responsibility for and monitored the effectiveness and performance of internal controls within the environment.	No exceptions noted.
			Inspected the compliance summary meeting minutes to determine that operational management assigned responsibility for and monitored the effectiveness and performance of internal controls within the environment.	No exceptions noted.
		A third-party performs an independent assessment of the entity's controls environment annually to assess the effectiveness of internal controls within the environment.	Inspected the entity's completed attestation report to determine that a third-party performed an independent assessment of the entity's controls environment annually to assess the effectiveness of internal controls within the environment.	No exceptions noted.

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Control Environment				
CC1.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
CC1.3	COSO Principle 3: Management establishes, with board oversight, structures, reporting lines, and appropriate authorities and responsibilities in the pursuit of objectives.	A documented organizational chart is in place that defines organizational structures, lines of reporting, and areas of authority.	Inspected the organizational chart to determine that a documented organizational chart was in place that defined organizational structures, lines of reporting, and areas of authority.	No exceptions noted.
		Executive management reviews the organizational chart annually and makes updates to the organizational structure and lines of reporting, if necessary.	Inspected the revision history of the organizational chart to determine that executive management reviewed the organizational chart annually and made updates to the organizational structure and lines of reporting, if necessary.	No exceptions noted.
		Roles and responsibilities are defined in written job descriptions and communicated to personnel through the entity's Intranet site.	Inspected the job descriptions for a sample of roles and the entity's Intranet to determine that roles and responsibilities were defined in written job descriptions and communicated to personnel through the entity's Intranet site.	No exceptions noted.
		Executive management reviews job descriptions annually and makes updates, if necessary.	Inspected the revision history for job descriptions for a sample of roles to determine that executive management reviewed job descriptions annually and made updates, if necessary.	No exceptions noted.
		Upon hire, personnel are required to acknowledge the employee handbook and code of conduct.	Inspected the signed employee handbook acknowledgements for a sample of new hires to determine that upon hire, personnel were required to acknowledge the employee handbook and code of conduct.	No exceptions noted.

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Control Environment				
CC1.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
		Executive management has established proper segregations of duties for key job functions and roles within the organization.	Inspected the organizational chart, the completed internal controls matrix, and job descriptions for a sample of roles to determine that executive management established proper segregations of duties for key job functions and roles within the organization.	No exceptions noted.
		Roles and responsibilities defined in written job descriptions consider and address specific requirements relevant to the system.	Inspected the job descriptions for a sample of roles to determine that roles and responsibilities defined in written job descriptions considered and addressed specific requirements relevant to the system.	No exceptions noted.
		A vendor risk assessment is performed on an annual basis which includes reviewing the activities performed by third-parties.	Inspected the vendor management policy and procedures to determine that a vendor risk assessment was required on an annual basis.	No exceptions noted.
			Inspected the completed risk assessment to determine that a vendor risk assessment was performed on an annual basis which included reviewing the activities performed by third-parties.	No exceptions noted.
		Executive management considers the roles and responsibilities performed by third-parties when documenting the organizational chart and defining job descriptions.	Inspected the organizational chart and job descriptions for a sample of roles to determine that executive management considered the roles and responsibilities performed by third-parties when documenting the organizational chart and defining job descriptions.	No exceptions noted.

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Control Environment				
CC1.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
CC1.4	COSO Principle 4: The entity demonstrates a commitment to attract, develop, and retain competent individuals in alignment with objectives.	Policies and procedures are in place that outline the performance evaluation process as well as the competency and training requirements for personnel.	Inspected the employee performance evaluation policies and procedures and competency and training requirements policies and procedures to determine that policies and procedures were in place that outlined the performance evaluation process as well as the competency and training requirements for personnel.	No exceptions noted.
		Performance and conduct evaluations are performed for personnel on an annual basis.	Inspected the performance and conduct evaluation tracking spreadsheet for a sample of current employees to determine that performance and conduct evaluations were performed for personnel on an annual basis.	No exceptions noted.
		The entity evaluates the competencies and experience of candidates prior to hiring, and of personnel transferring job roles or responsibilities.	Inspected the resumes for a sample of new hires to determine that the entity evaluated the competencies and experience of candidates prior to hiring, and of personnel transferring job roles or responsibilities.	No exceptions noted.
		Job requirements are documented in the job descriptions and candidates' abilities to meet these requirements are evaluated as part of the hiring or transfer process.	Inspected the job descriptions for a sample of roles and the resumes for a sample of new hires to determine that job requirements were documented in the job descriptions and candidates' abilities to meet these requirements were evaluated as part of the hiring or transfer process.	No exceptions noted.

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Control Environment				
CC1.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
CC1.5	COSO Principle 5: The entity holds individuals accountable for their internal control responsibilities in the pursuit of objectives.	The entity has a recruiting department that is responsible for attracting individuals with competencies and experience that align with the entity's goals and objectives.	Inspected the entities recruiting forms to determine that the entity had a recruiting department that was responsible for attracting individuals with competencies and experience that aligned with the entity's goals and objectives.	No exceptions noted.
		Executive management has created a training program for its employees.	Inspected the information security and awareness training outline to determine that executive management created a training program for its employees.	No exceptions noted.
		As part of the performance evaluation process, the entity rewards its personnel for exceeding expectations as it relates to their job role and responsibilities.	Inspected the employee performance evaluation policies and procedures to determine that as part of the performance evaluation process, the entity rewarded its personnel for exceeding expectations as it relates to their job role and responsibilities.	No exceptions noted.
		Prior to employment, personnel are required to complete a background check.	Inspected the background check policies and procedures and the completed background check for a sample of new hires to determine that prior to employment, personnel were required to complete a background check prior to employment.	Testing of the control activity disclosed that a background check did not occur prior to hire for one of 16 new hires sampled.
		A documented organizational chart is in place that defines organizational structures, lines of reporting, and areas of authority.	Inspected the organizational chart to determine that a documented organizational chart was in place that defined organizational structures, lines of reporting, and areas of authority.	No exceptions noted.

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Control Environment				
CC1.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
		Performance and conduct evaluations are performed for personnel on an annual basis.	Inspected the performance and conduct evaluation tracking spreadsheet for a sample of current employees to determine that performance and conduct evaluations were performed for personnel on an annual basis.	No exceptions noted.
		Executive management reviews the job requirements and responsibilities documented within job descriptions annually and makes updates, if necessary.	Inspected the revision history for job descriptions for a sample of roles to determine that executive management reviewed the job requirements and responsibilities documented within job descriptions annually and made updates, if necessary.	No exceptions noted.
		Sanction policies which include probation, suspension and termination are in place for employee misconduct.	Inspected the employee handbook to determine that sanction policies which included probation, suspension and termination were in place for employee misconduct.	No exceptions noted.

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Information and Communication				
CC2.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
CC2.1	COSO Principle 13: The entity obtains or generates and uses relevant, quality information to support the functioning of internal control.	Organizational and information security policies and procedures are documented for supporting the functioning of controls and processes and made available to its personnel through the entity's Intranet site.	Inspected the entity's Intranet and internal resource page to determine that organizational and information security policies and procedures were documented for supporting the functioning of controls and processes and made available to its personnel through the entity's Intranet site.	No exceptions noted.
		Edit checks are in place to prevent incomplete or incorrect data from being entered into the system.	Observed personnel enter information into the in-scope system and determined that edit checks were in place to prevent incomplete or incorrect data from being entered into the system.	No exceptions noted.
			Inspected an example edit check configuration to determine that edits checks were in place to prevent incomplete or incorrect data from being entered into the system.	No exceptions noted.
		Data flow diagrams are documented and maintained by management to identify the relevant internal and external information sources of the system.	Inspected the entity's network flow diagram to determine that data flow diagrams were documented and maintained by management to identify the relevant internal and external information sources of the system.	No exceptions noted.

TRUST SERVICES CRITERIA FOR THE SECURITY CATEGORY				
Information and Communication				
CC2.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
CC2.2	COSO Principle 14: The entity internally communicates information, including objectives and responsibilities for internal control, necessary to support the functioning of internal control.	Data that entered into the system, processed by the system, and output from the system is protected from unauthorized access.	Inspected the file integrity monitoring ('FIM') configurations, intrusion detection system ("IDS") configurations, encryption methods and configurations and virtual private network ("VPN") authentication configurations to determine that data entered into the system, processed by the system, and output from the system was protected from unauthorized access.	No exceptions noted.
		Data is only retained for as long as required to perform the required system functionality, service, or use.	Inspected the data retention policies and procedures to determine that data was retained for only as long as required to perform the required system functionality, service, or use.	No exceptions noted.
		Roles and responsibilities are defined in written job descriptions and communicated to personnel through the entity's Intranet site.	Inspected the job descriptions for a sample of roles and the entity's Intranet to determine that roles and responsibilities were defined in written job descriptions and communicated to personnel through the entity's Intranet site.	No exceptions noted.
		The entity's policies and procedures, code of conduct and employee handbook are made available to employees through the entity's Intranet site.	Inspected the entity's Intranet and internal resource page to determine that the entity's policies and procedures, code of conduct and employee handbook were made available to employees through the entity's Intranet site.	No exceptions noted.

CC2.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
		Upon hire, employees are required to read and acknowledge the information security policies and procedures and complete information security and awareness training.	Inspected the entity's Intranet to determine that the entity's policies and procedures, code of conduct and employee handbook were made available to employees through the entity's Intranet site.	No exceptions noted.
		Current employees are required to read and acknowledge the information security policies and procedures and complete information security and awareness training on an annual basis.	Inspected the signed employee handbook and information security and awareness training completion tracking tool for a sample of new hires to determine that upon hire, employees were required to read and acknowledge the information security policies and procedures and complete information security and awareness training.	No exceptions noted.
		Personnel are required to acknowledge the employee handbook and code of conduct on an annual basis.	Inspected the signed employee handbook and information security and awareness training completion tracking tool for a sample of current employees to determine that current employees were required to read and acknowledge the information security policies and procedures and complete information security and awareness training on an annual basis.	No exceptions noted.
			Inspected the signed employee handbook acknowledgements for a sample of current employees to determine that personnel were required to acknowledge the employee handbook and code of conduct on an annual basis.	No exceptions noted.

		Upon hire, personnel are required to acknowledge the employee handbook and code of conduct.	Inspected the signed employee handbook acknowledgements for a sample of new hires to determine that upon hire, personnel were required to acknowledge the employee handbook and code of conduct.	No exceptions noted.
		Executive management meets annually with operational management to discuss the entity's objectives as well as roles and responsibilities.	Inspected the budget review meeting invite and annual budget plan to determine that executive management met annually with operational management to discuss the entity's objectives as well as roles and responsibilities.	No exceptions noted.
		Employees, third-parties, and customers are directed on how to report issues and concerns.	Inspected the employee handbook and reporting tool to determine that employees, third-parties and customers were directed on how to issues report and concerns.	No exceptions noted.
		Changes to job roles and responsibilities are communicated to personnel through updated job descriptions.	Inspected the entity newsletters sent via e-mail to determine that changes to job roles and responsibilities were communicated to personnel through updated job descriptions.	No exceptions noted.
		Documented escalation procedures for reporting failures incidents, concerns and other complaints are in place and made available to employees through the entity's Intranet site.	Inspected the incident response policies and procedures and the entity Intranet to determine that documented escalation procedures for reporting failures incidents, concerns and other complaints were in place and made available to employees through the entity's Intranet site.	No exceptions noted.

Logical and Physical Access Controls				
CC6.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
		Data coming into the environment is secured and monitored through the use of firewalls and an IDS.	Inspected IDS configurations, firewall rule sets and the network diagram to determine that data coming into the environment was secured and monitored through the use of firewalls and an IDS.	No exceptions noted.
		A demilitarized zone (DMZ) is in place to isolate outside access and data from the entity's environment.	Inspected the DMZ settings to determine a DMZ was in place to isolate outside access and data from the entity's environment.	No exceptions noted.
		Server certificate-based authentication is used as part of the Transport Layer Security ('TLS') encryption with a trusted certificate authority.	Inspected encryption configurations for data in transit and digital certificates to determine that server certificate-based authentication was used as part of the TLS encryption with a trusted certificate authority.	No exceptions noted.
		Critical data is stored in encrypted format using software supporting the Advanced Encryption Standard (AES).	Inspected encryption configurations for data at rest to determine that critical data was stored in encrypted format using AES.	No exceptions noted.
		Encryption keys are protected during generation, storage, use, and destruction.	Inspected the data encryption and key management procedures to determine that encryption keys were required to be protected during generation, storage, use, and destruction.	No exceptions noted.

Logical and Physical Access Controls				
CC6.0	Criteria	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results
CC6.2	Prior to issuing system credentials and granting system access, the entity registers and authorizes new internal and external users whose access is administered by the entity. For those users whose access is administered by the entity, user system credentials are removed when user access is no longer authorized.	Logical access to systems is revoked as a component of the termination process.	Inspected the termination procedures, user access listings and user access revocation ticket for a sample of terminated employees to determine that logical access to systems was revoked for an employee as a component of the termination process.	Testing of the control activity disclosed that access was not revoked in a timely manner for one of 10 terminated employees sampled.
		Documented policies and procedures are in place regarding system settings, authentication, access, and security monitoring.	Inspected the information security policy to determine documented policies and procedures were in place regarding system settings, authentication, access, and security monitoring.	No exceptions noted.
		Logical access to systems is approved and granted to an employee as a component of the hiring process.	Inspected the hiring procedures, user access listings and user access request ticket for a sample of new hires to determine that logical access to systems was approved and granted to an employee as a component of the hiring process.	No exceptions noted.
		Logical access to systems is revoked as a component of the termination process.	Inspected the termination procedures, user access listings and user access revocation ticket for a sample of terminated employees to determine that logical access to systems was revoked for an employee as a component of the termination process.	Testing of the control activity disclosed that access was not revoked in a timely manner for one of 10 terminated employees sampled.

## MANAGEMENT'S RESPONSE TO TESTING EXCEPTIONS

Control Point	Control Activity Specified by the Service Organization	Test Applied by the Service Auditor	Test Results	Management's Response
CC1.1 CC1.4	Prior to employment, personnel are required to complete a background check.	Inspected the background check policies and procedures and the completed background check for a sample of new hires to determine that prior to employment, personnel were required to complete a background check prior to employment.	Testing of the control activity disclosed that a background check did not occur prior to hire for one of 16 new hires sampled.	Individual was a long-time vendor contact that was onboarded quickly. Background check was completed quickly after hiring/onboarding.
CC6.1 CC6.2 CC6.3	Logical access to systems is revoked as a component of the termination process.	Inspected the termination procedures, user access listings and user access revocation ticket for a sample of terminated employees to determine that logical access to systems was revoked for an employee as a component of the termination process.	Testing of the control activity disclosed that access was not revoked in a timely manner for one of 10 terminated employees sampled.	During a mass hiring event for a new client, we failed to disable access promptly for one of the individuals that failed to show up for training.
